Subject: [none]

Hi gang

I am really in poor shape, used to design and build very complicated equipment as a proffession. since my stroke can not even get a 2 tube seletojet working. Need something to help seperate cw signals as I cannot copy them with other sigs near. SOMETHING SIMPLE my ability to get anything complex operating is between 0 and none. I have heard several of you mention a simple audio filter using a toroid that would be fine (IF I COULD GET THE TOROID), so if anybody can give me some dope on this sublect (nothing complicated now) I would be very happy. thanks much guys.

Thank the good LORD for all that you have!!!

67yr old semi disabled senior trying to get code speed to 13wpm
(stroke got my eyesight, balance & coordination) SO ONLY BA'S NO SOLID STATE

Subject: Re: 7044 tube

A suggestion - ask the guys on rec.audio.tubes (newsgroup) if there is no response here!

Regards - Bry
